

HOPKINSVILLE KENTUCKIAN

Weather for Kentucky--Tuesday, fair and cold.

HOPKINSVILLE KENTUCKY, TUESDAY, DECEMBER 11, 1917.

Vol. 37 No. 148

EDITORIAL COMMENT

Equador has severed diplomatic relations with Germany.

They say when you don't like snow it is a sign you are getting old. Oh! what a lovely snow!

You don't see quite so many silk stockings exposed as you did this time last week.

Two sisters from Lexington, both widows, went to Jeffersonville with Louisville men younger than themselves and had a double wedding.

With Christmas only two weeks off, and real Christmas weather prevailing, it is high time to look over the Kentuckian's advertising columns and get busy.

Congressman Tilson, of Connecticut, has asked for furloughs for 8,000 New England soldiers in Southern camps, allowing them to visit their homes ten days Christmas.

London, the Socialist, was the only member of either House of Congress to vote against the declaration that a state of war exists with Austria-Hungary. The declaration makes alien enemies of 1,000,000 Hungarians and Austrians in this country, but many of them are at heart Americans.

The snow of Saturday morning was the deepest fall for several years, being 13 inches on a level. In many places it was drifted two feet deep. The snow continued to fall with much wind, until well into the forenoon.

There are now 2,800 Germans held in the United States, 2,364 interned sailors and the rest aliens taken into custody. Prisoners taken in battle by Americans could be sent to American camps and maintained much cheaper than feeding them in European camps with exported food. There is a good deal of work they could be made to do.

Udine, pronounced Oo-de-na, the Italian town taken by the Germans, is more than 3,000 years old, and has 50,000 people. Spinning is its chief industry. Attila, the Hun, took it in 451 and Napoleon was there and broke the plate there to show how he would crush Austria. It is an ancient, untidy place and the Huns will probably burn it when their retreat begins.

QUESTIONNAIRES TO BE OUT DEC. 15

All Registrants Not Yet Accepted Will Have To Sign Them.

Beginning on December 15, the local exemption board will mail out government questionnaires to men subject to selective military service.

Questionnaires will have to be mailed out from the local office at the rate of 125 a day. Mailing will begin on December 15, and on each succeeding day thereafter, for 20 days including the first day, one twentieth of the list will be mailed, or 5 per cent. The mailing of questionnaires will accordingly occupy 20 days' time.

Men already in the service will not receive questionnaires. They will be sent only to those registrants for the draft who have not yet been inducted into military service, whether they have heretofore been examined, and rejected, or exempted.

Paducah To Can.

The tomato and vegetable canning factory which will be erected here by the Paducah Vinegar Works, according to an announcement made yesterday by President R. W. McKinney, will be one of the largest and most modern canneries in the state. The new cannery will employ about 200 people. The local company will expend \$20,000 for machinery alone, in putting up the factory. The plant will have a capacity in output of 36,000 cans of tomatoes in 10 hours.

IMO SURVIVORS ARE ARRESTED

Mont Blanc Captain and Pilot Detained and Bad Navigation Charged.

95 MORE BODIES FOUND

Deluge of Rain Follows Blast Fire and Blizzard Adds Still Greater Horror

Halifax, N. S., Dec. 10.—No official attempt was made here to-day to check up or revise the long list of dead and injured resulting from last Thursday morning's disaster when a munitions ship cargo exploded in the harbor.

The morgue officials held to their estimate of 4,000 dead, but other observers said that estimate was too great by half.

The admiralty court to determine responsibility for the collision of the vessels that caused the explosion will open its hearings tomorrow. To-day the survivors of the Norwegian steamer Imo, which rammed the Mont Blanc, laden with munitions, were arrested and Captain Lamedoc and pilot Mckay of the munitions ship also were ordered detained as witnesses.

A joint appeal by the mayors of Halifax and Dartmouth was made to the Canadian public to-day for money for the relief of the homeless and the reconstruction of that part of the city which is in ruins. It was said that between \$20,000,000 and \$35,000,000 would be required.

A heavy rainstorm interrupted the systematic search for bodies, but by night 95 additional bodies had been placed in the morgue. Several deaths occurred among the injured.

The task confronting the relief committees seemed almost hopeless, but later in the day the skies cleared and cheering word came from the physicians in charge of the tents in which 600 of the homeless had found shelter. The tents had withstood the storm and the occupants were as comfortable as could be expected.

CARL M. JOHNSON,

A Hopkinsville Boy, Passes the Illinois Bar Examination.

Carl M. Johnson, son of Wm. M. Johnson, of this city, has passed bar examination and is now entitled to practice in all branches of the courts of Illinois. Mr. Johnson went to Chicago a few years ago as an invalid to undergo an operation by his brother, Dr. Warren Johnson, which would bring him back to his natural self. During his period of illness in the hospital the thought of the study of law appealed to him, and when he became well enough he entered the law school and graduated from same last spring. While studying he was employed with the City Club of Chicago, where he remained till his course was completed. He passed the examination without a hitch and is debating whether he will practice in Chicago or take the Kentucky board. However, we know that wherever his shingle may hang his success goes with it, because he has shown his ability to reach the highest level thus far, and we know his many friends of Hopkinsville are with us in wishing him continued success.

Martin Taken to Penitentiary.

Paducah, Ky., Dec. 8.—Lube Martin, colored, convicted of the murder of Guthrie Dluguid at Murray, Ky., in 1916, and who was almost lynched was removed from the McCracken county jail Wednesday and taken to the Eddyville penitentiary. He is sentenced to die in the electric chair. The court of appeals has announced no decision in Martin's appeal for a new trial.

TO BUILD SANITORIUM

Baptists of Kentucky Plan a Big Campaign For \$250,000.

Louisville, Dec. 10.—The Baptist State Mission Board, in session here last week, approved plans for a \$250,000 Baptist sanatorium to be erected in Louisville and authorized a State-wide whirlwind campaign for raising funds.

The board, after accepting the resignation of N. T. Barnes, secretary of the State B. Y. P. U., declined to adopt the plan of retirement and authorized the various departments to plan for larger fields of activity during the coming year.

The board approved the appointment of Dr. O. E. Bryan as corresponding secretary, succeeding Dr. W. D. Powell, who has the position for the last ten years.

IDELLE CRUTE

Young Printer Lately Returned From Florida, Died Saturday Night.

Idelle Crute, a young man who was for several years a printer in the Kentuckian office, died at the home of his parents in Cadiz Saturday night. He recently returned from Palm Beach, Fla., where he worked at his trade last year and was in such poor health that he went to his home at Cadiz. He was in this city a few weeks ago and was hopeful, but apparently still growing weaker. The details of his death have not been received. He was 20 years old and a member of the Methodist church.

Jolly For John.

Big-bodied, big-brained and big-hearted John Feland, of Hopkinsville, has been prominent in the trials of cases at this term, and has been "a steady visitor in our midst," and a guest of the Jefferson Davis Inn. He has met with gratifying success in the conduct of his cases, and his speech as one of the attorneys for the prosecution in the Latham case was a gem of eloquence and deeply impressive. He has scores of friends in Todd county, Democrats and Republicans alike, who wish him the fullest measure of success in the practice of his profession.—Elkton Times.

Soldier Loses Fingers.

Rufus Speed, an Adair county soldier, whose station is at Camp Shelby, Miss., had two fingers cut off while trimming vines. He had arrived home on a furlough Saturday.

PURELY PERSONAL.

Mrs. C. N. Fox and little daughter, Nancy Lee, of Nashville, Tenn., are visiting in the city.

Lieut. Wm. Warfield will leave to-day for Fort Douglas, Arizona, after a ten days' leave spent with relatives here.

Mrs. Lille Price Smith, of Atlanta, is visiting her sister, Mrs. George S. Randle.

Mr. and Mrs. S. J. Samuel, of Chicago, are visiting Mr. H. M. Frankel's family.

John P. Thomas is at home until after the holidays.

L. A. Tuggle is already here to celebrate Christmas.

Mrs. Kate Starling Breathitt, of Winona Lake, Ind., has arrived to spend the winter with relatives.

New Landlord at Guthrie.

Mr. and Mrs. G. W. Baker, formerly of Elkton, and who for the past few years have been engaged in the hotel business at Dechard, Tenn., have moved to Guthrie to reside. Mr. Baker having been selected by the Crescent News & Hotel Co., of New Orleans, as manager of the Hotel Guthrie to succeed H. C. Hill, who has resigned and will engage in farming near Houston, Texas.

KORNILOFF AND KALEDINES HEAD NEW REVOLUTION

ITALIANS BEAT BACK THE INVADERS AND SITUATION THEN IMPROVES.

Radicals In Saddle at Russian Capital Declare There Will Be No Mediation.

POPULAR CHIEFS UNITED

Uprising Richly Financed By Bourgeoisie and Constitutional Democrats.

The long expected civil war in Russia apparently has come. Gen. Kaledines, the leader of the Don Cossacks, reported by Gen. Korniloff, former commander-in-chief of the Russian forces, is declared in an official communication issued by the Bolshevik government to have raised the standard of revolt in the Don Cossack region against the people and the revolution.

As a counter to the movement the Bolshevik government has ordered its troops and followers immediately to set to work to put down the uprising, forbidding even attempt at mediation.

No details of the uprising are as yet to hand, but the proclamation of the Bolshevik government asserts that the constitutional democrats and the bourgeoisie are aiding the movement against the Leninite faction. The Don Cossacks of whom Kaledines is the leader, are famous as dashing fighters and in choosing Korniloff as his right hand man, Kaledines obtains a military man of unquestionable ability.

Of equal interest in the world war is the brilliant stand the Italians have made in keeping the push of the Austro-German forces from the Asiago plateau region to the plains of northern Italy. Although the enemy had bent back the line of the defenders to the point where it seemed it must give way under the press of overwhelming numbers of men and guns, the Italians, reinforced by the full strength of the British and French troops rushed to the front, have stemmed the tide of on onslaught and for the moment at least brought the fighting to a pause.

Their infantry and shock troops balked, the Austrian and German guns are still heavily bombarding various points along the front between the Piave and Brontia rivers, but they are being answered almost shot for shot by the cannon of the allies.

With the Kaiser?

Some people were made to be soldiers.

But the Irish were made to be cops; Sauerkraut was made for the Germans.

And spaghetti was made for the wops.

Fish were made to drink water,

And bums were made to drink booze;

Banks were made for money,

And money was made for Jews.

Everything was made for something; Most everything but the miser.

Mr. Wilson was made to be president,

But who in the h— made the Kaiser? —Anonymus.

Complete the Course.

Among the officers and men who graduated in certain work at Camp Taylor are two Hopkinsville boys:

ASSISTANT INSTRUCTOR.

W. T. Radford, Capt. 336th Infantry.

BAYONETS.

Lieut. E. J. Melton, 15th P. T. Bn.

Next To The "Big One"

The deepest snow in this latitude within the memory of "the oldest inhabitant" was Feb. 2, 1886, 26 inches. The last "big snow" was Feb. 17, 1910 when it was about 11 inches. This one is 2 inches deeper and is the greatest single snowfall in 30 years.

COLDEST IN SIXTEEN YEARS

City Swept by Severest Blizzard Since 1901, Mercury then to 14.

SNOW 13 INCHES DEEP

Stinging Wind Blew 45 Miles at Highest and but Dared Face It.

An icy temperature again hovered over Hopkinsville yesterday.

A second blizzard followed that of Friday night. The city was swept by a biting, stinging wind from the south west that blew 44 miles an hour at its highest. More snow fell.

The government mercury fell to 12 degrees below zero Sunday morning and 13 below yesterday.

The mercury slowly crawled up to 10 above at 2 p. m., the highest for the day.

The snow is a foot or more deep and no wholesale attempts have been made yet to clean the sidewalks. Sunday was not a day for labor and the snow is now frozen to the ground. Little hope is held out for better weather for three or four days.

It is the lowest temperature since 1901, when the record was 14 below.

ONLY FOUR ABSENTEES

At the December Meeting of the Athenaeum—Two Splendid Papers.

The Athenaeum meeting Thursday night was more largely attended than any meeting for a long time. Of the 29 members, 25 were present. The only vacancy was filled by electing Dr. T. W. Blakey, a former member.

The program consisted of two splendid papers on widely different subjects.

Jas. A. McKenzie discussed "Opium" as a commercial and scientific drug and G. C. Koffman told of "The Social Value of History" in a very able literary article of the most interesting character. The papers provoked a lengthy discussion.

Those present were: A. H. Eckles, John Stites, H. W. Linton, J. A. McKenzie, G. C. Koffman, E. L. Weathers, C. E. Woodard, L. E. Foster, Geo. E. Gary, Chas. M. Meacham, F. M. Stites, Austin Bell, S. P. White, C. M. Thompson, J. W. Downer, Frank Rives, L. H. Davis, Ira L. Smith, T. C. Underwood, T. W. Perkins, W. O. Soyars, R. L. Woodard. The absentees were S. Y. Trimble, W. T. Fowler, A. H. Clark and T. J. McReynolds.

WHAT TO READ

If you are rejoicing read the third chapter of the Philippians.

If you have the blues, read the twenty-seventh Psalm.

If people seem unkind, read the fifteenth chapter of John.

If you're all out of sorts, read the twelfth chapter of Hebrews.

If your pocketbook is empty, read the thirty-seventh Psalm.

If you are hungry, read the sixth chapter of John.

If you are discouraged about your work, read Psalm cxxvi.

If you are losing confidence in men, read the thirteenth chapter of Corinthians I.

If you can't have your own way in everything, keep silent and read the third chapter of James.

If you have backslidden, read the seventy-third Psalm.

a number. The Postal regulations
require subscriptions to be paid in
advance.

Sheldon Sausley has turned his pa-
per at Richmond into a daily.

Judge Thurman, of Springfield, also
asks to be excused from running
against Ollie James.

The Falmouth telephone manager
complains that young men are seri-
ously interfering with his business
by marrying his "hello" girls.

G. E. McKinney, associate editor of
Adairville Enterprise, has been draft-
ed and his mother advertises the pa-
per for lease.

No news from your soldier boy in
France is good news. The report of
all casualties is cabied immediately
and made public.

Lieut. Gov. Black again occupied
the Executive suits at the Capitol
Friday and Saturday in the absence
of Gov. Stanley, who was hunting on
Reelfoot Lake, Tenn.

It develops that the female "Death
Battalion" at Petrograd surrendered
when the first gun was fired. The
girls did not swallow their death po-
tions, as they surrendered to their
own countrymen.

A shortage of mail sacks is embar-
rassing the Government, due to the
sending of 17,000 sacks of mail to the
soldiers in France. An energetic
hunt is being made for all sacks held
at cantonments and other places.

Novel Juvenile Reformatory.
In Dorsetshire, England, there has
been established a "Republie," called
the "Little Commonwealth," which has
its own coinage and which is used as
a reformatory for youngsters from
two years of age upward. The ex-
periment has proved a success. The
children sent down there from metro-
politan police court to reform earned
eight to nine cents an hour, out of
which they paid \$2.75 a week for
board and lodgings. The Republic has
been recognized by the home office as
a certified reformatory.

The Art of Living.
If music is the art in which you are
ambitious to distinguish yourself, you
may have to go away from home to get
the necessary training, and perhaps
cross the water, to secure the finishing
touches. But the art of living can be
practiced right at home, and very like-
ly you will have as good instruction as
can be found anywhere, in the circle
of your own family.—Exchange.

Willing Work Always Prized.
That man will be a joy to his "boss"
who will give willing obedience un-
der any and all circumstances. What-
ever work falls to his lot will be per-
formed in the best possible manner,
even when it is not the kind he chose.
An army of such workers would win
anywhere against much larger num-
bers. The pity of it is, that com-
pared with the host that works under
protest, the faithful are pitifully few.
—Exchange.

Motion Pictures "Edited."
After a moving picture reel has been
made it must be "edited" in somewhat
the same method as is a manuscript.
This operation is performed by the
editor making his direction in a dictating
machine as the reel is worked off in
front of him.

Snapper Abounds in Australia.
The snapper is the characteristic Aus-
tralian fish. It is found all round the
Australian coasts at some time of the
year, also in New Zealand and part
of the Indian ocean. In haunts where
the ocean bed is rock strewn or rubble.
Some think the snapper ought to have
been on the Australian coat-of-arms,
because he will remain when kangaroo
and emu are gone. Snapper is the
delicest morsel to the shark, but its
large, beautiful eyes take in 20 points
of the compass.

TOBACCO RECORD
IS BROKEN

More Than a Million Pounds
on Henderson Floors Open-
ening Day of Sale.

Henderson, Ky., Dec. 5.—The loose
leaf tobacco market opened this morn-
ing with the greatest amount of
weed ever delivered in the history of
the city for a single sale. All four
floors were filled to capacity, con-
taining more than a million pounds.
There is fully 300,000 pounds of to-
bacco on wagons which cannot be de-
livered to the houses until the weed
on the floors is removed.

The first sale was held at the Rash
and Cooper house. Burley leaf sold
up to \$33 a hundred and dark leaf up
to \$25.50. Lugs ranged from \$14 to
\$22, and trash from \$9 to \$13.50. A
total of 290,000 pounds was sold at
this house and buyers started bidding
at the Edwards and Melton house late
in the afternoon, where 50,000 pounds
were sold before night. The sale will
continue at this house Thursday morn-
ing. Then the Birk and Lancaster
and Birk, Lancaster and Soaper house
will hold sales.

The floor average at the Rash and
Cooper house was \$15 a hundred.

Henderson has been a strip tobacco
market for more than 100 years, but
no delivery has ever equaled the one
for the initial sales.

Livery stables were so crowded
that growers were forced to leave
their loads and take their teams home.
Streets around all the houses are al-
most blocked with tobacco-laden wag-
ons.

If the delivery continues next week
in volume as has this week, more
than \$500,000 will be paid to growers
the first week of sales.

A Training Camp For Negro
Officers.

At a special reserve officers' train-
camp established at Fort Des Moines,
Iowa, exclusively for negro citizens,
125 men of the colored race have
been commissioned as officers in the
National Army. Of this number, 105
were made captains; the remainder
were awarded the rank of first and
second lieutenants. These especially
trained colored officers will be assign-
ed to duty with the full division of
drafted colored troops, about to be
mobilized in the various cantonments
throughout the country. For the first
time in the history of the United
States Army, colored officers will
lead colored troops. This the War
Department deems a matter of jus-
tice in view of the splendid record of
the black citizen as a fighting man.

The training camp at Fort Des
Moines was opened on June 18, un-
der the command of Brigadier-Gen-
eral C. C. Ballou, with Col. Charles
W. Castle as second in command and
head of a staff of twelve West Point
instructors. Twelve hundred and
fifty men were enrolled for training,
a picked body of colored citizens, rep-
resenting every State in the Union,
many colleges, and every profession
in which the colored man has distin-
guished himself. Many lawyers, phy-
sicians, clergymen, college instruc-
tors, and successful business men
were among the number. Tuskegee
alone furnished sixty men. Two
hundred and fifty men from the four
colored regiments of the regular army
were accepted as candidates.—From
"Training Colored Officers," by Lucy
France Pierce, in the American Re-
view of Reviews for December, 1917.

STUDENT NURSES WANTED.

The Red Cross is daily issuing
statements, concerning the unusual
demand which will be made upon
their nursing service in the near fu-
ture and urging young women to
begin a systematic training at once.

There is an opening for three stu-
dent nurses at the Jennie Stuart Mem-
orial Hospital. Doctors and nurses
are helping to win this war. Do your
bit by making application at once to
THE SUPERINTENDENT,
Jennie Stuart Memorial Hospital,
Hopkinsville, Ky.

The regular annual meeting of the
stockholders of the First National
Bank, of Hopkinsville, Kentucky, will
be held at the office of the bank, be-
tween the hours of ten and twelve
o'clock a. m., on Tuesday, January 8,
1918, for the purpose of electing Di-
rectors for the ensuing year.—Ad-
vertisement.

GLAD TO TESTIFY

Says Watoga Lady, "As To What
Cardul Has Done For Me, So
As To Help Others."

Watoga, W. Va.—Mrs. S. W. Gladwell,
of this town, says: "When about 15 years
of age, I suffered greatly. Sometimes
would go a month or two, and I had
terrible headache, backache, and bearing-
down pains, and would just drag and
had no appetite. Then... it would last
... two weeks, and was so weakening,
and my health was awful.

My mother bought me a bottle of
Cardul, and I began to improve after
taking the first bottle, so kept it up till I
took three... I gained, and was well
and strong, and I owe it all to Cardul.

I am married now and have 3 children.
I have never had to have a doctor for
female trouble, and just resort to Cardul
if I need a tonic. I am glad to testify to
what it has done for me, so as to help
others."

If you are nervous or weak, have head-
aches, backaches, or any of the other
ailments so common to women, why not
give Cardul a trial? Recommended by
many physicians. In use over 40 years.
Begin taking Cardul today. It may
be the very medicine you need.

ATTENTION TO HOGS IN FALL

Animals Are Not as Resistant to Dis-
ease as in Spring—Water Supply
Is of Importance.

(By E. R. SPENCE.)

Hogs are not as resistant to disease
in the fall as they are in the spring
when getting an abundance of green
forage, and having access to a wide
range. It is necessary, therefore, to
give them more attention and better
care to offset seasonal conditions and
danger from new corn.

Do not feed in the same lot, or on
the same mere of ground, day after
day. This contaminates the feeding
place, and also attracts crows, pig-
eons, and sparrows which may have
been feeding with a cholera infected
herd. Throw the feed out in a differ-
ent spot each day, thus giving the
pigs a clean "plate" from which to eat.

The water supply is of much im-
portance to the health of the hogs at
this time of year. Old mud wallows
are never good, but are not so bad if
the hogs can have pure water to
drink, but if forced to bathe and drink
in the same "tub" serious trouble can
be expected at any time. See that
they have an abundance of pure water
to drink, situated near the wallow
holes or feeding places. Pure water
will aid materially in keeping the
herd cholera free.

USEFUL DIP VAT FOR SHEEP

Device Shown in Illustration Is Con-
venient Piece of Equipment
for Any Farmer.

A dipping vat similar to the one
illustrated is a convenient piece of
equipment for any farmer to have,
since it can be used for swine and
other stock. It should be at least 8
feet long, 22 inches wide and 4 feet
deep. It may be made of concrete,
wood or galvanized iron. The vat
should be placed on a hole 2 feet deep.

Handy Dipping Vat.

so that the operators may handle the
sheep conveniently. At the time of
dipping it is desirable to have a chute
of permanent or temporary construc-
tion. This provides a means of plac-
ing the sheep in the vat one at a
time. At the outgoing end the vat has
an angle of 45 degrees provided with
cleats, or notches, which give the
sheep a foothold when leaving the
vat. A sloping platform, also pro-
vided with cleats, should be construc-
ed at the end, from which the sheep
leave the vat; this allows the solution
to drain off the animals and return to
the vat.

MAKING PROFIT FROM SWINE

Proper Care and Feed Are Necessary
—Provide Comfortable Quarters
and Lots of Sunshine.

In order to make a profit from pigs
it is necessary to give them the prop-
er care and feed. They should be pro-
vided with clean, comfortable quarters,
exercise, and plenty of sunshine. The
sow should be given special care at
farrowing time. She should be fed
lightly for a few days after farrow-
ing, and the amount of feed gradu-
ally increased as the young pigs de-
velop.

The ration for the sow at this time
should be one which will produce a
heavy flow of milk. A good ration for
this purpose is one composed of corn,
shorts, bran, a small amount of tank-
age, and a good quality of alfalfa fed
from a rack. Bran may make up 10
per cent of the ration, as it has a ben-
eficial effect on the digestive system
and tends to increase the milk pro-
duction.

PROPER PASTURE FOR SHEEP

Attention Must Be Given to Parasites
That Prey on Woolly Creatures—
Move After Two Seasons.

Where sheep are kept as one of the
major businesses of the farm, partic-
ular attention must be paid to the pas-
ture upon which they graze, since
there seem to be a number of internal
and external parasites that prey up-
on the woolly creatures. After sheep
have pastured upon one piece of land
two seasons it is high time that they
were moved to the next pasture.

TROUBLE WITH LITTLE PIGS

Watch Closely for Sore Mouths—
Sometimes Advisable to Clip
Tuks—Use Disinfectant.

The little pigs should be watched
closely for sore mouths, especially in
large litters. It is sometimes advis-
able to clip the tuks from the pigs,
thus preventing them from scratch-
ing each other. In case of sore mouth,
wash the part frequently with a dis-
infectant.

Stopped German Drive Toward Venice

The skillful retreat of the Italian armies under the Duke of Aosta, com-
mander of the third division, from the Carso, where it was already hammering
at the doors of Trieste, was a maneuver of great strategic importance. The
Italians, after their defeat, returned to the fight, and in a counter attack drove
the Austro-German forces back across the lower Piave, making this sector im-
passable to the enemy and saving Venice from immediate danger. The battle
is now "nip-and-tuck" with the opposing armies, but the Italians, inspired by
this victory, have gained confidence and are now fighting with renewed energy.
The Duke of Aosta is shown here with his staff officers just before the re-
turn to the Piave.

UNCLE SAM AS TRUCK USER

Government Introduces Standardiza-
tion Which Is Expected to Be of
Big Value to Industry.

The fact that Uncle Sam has
standardized his trucks, so that any
part broken in action may be re-
placed by a similar part taken from
another truck, does not necessarily
mean that the most efficient delivery
system can be obtained only by the
use of a fleet of trucks identical in
model and design, says H. W. Slaus-
son, in Leslie's. It does mean, how-
ever, that there must be at least a
certain standardization of methods
and a certain interchangeability of
parts which will enable each truck
to spend its actual time in the most
effective service.

What the truck industry has need-
ed most has been a standardized sys-
tem of truck installation, operation
and cost keeping. Without such a
system it is impossible to determine
whether a truck or a fleet of trucks
is operating at its maximum effi-
ciency or whether an improvement
of some 50 or even 100 per cent in
effectiveness could be made by a
change here or an elimination of
waste effort there. Now, however, it
seems probable that this deficiency
is to be changed, and that Uncle
Sam, as the world's greatest truck
user, will evolve a truck system
which will prove of inestimable
benefit to every user of trucks be-
fore, and during, as well as after the
war.

INVENTS NEW MACHINE GUN

Mechanically Operated Loading Device
Keeps Belt Filled, Despite Con-
tinuous Use.

There comes now an inventor with
the significant name of Ford—not
Henry, however—with some start-
ling improvements for the machine
gun, asserts Edward C. Crossman in
the Popular Science Monthly.

The first one is a mechanically op-
erated loading machine to keep the
belt of the gun filled all the time re-
gardless of fire and the duration
thereof. The belt loader is operated
by the power of the machine on
which the gun is mounted, this to be
motorcycle, motor tricycle, automo-
bile, airplane or other power vehicle.

The second is a circulating water
cooling system, a la automobile, in
which the water passes from the
jacket around the gun barrel to a
regular automobile radiator, which
in turn is cooled by a fan driven by
the power that operates the loading
mechanism and which in turn is
merely the power plant of the car. A
centrifugal pump makes the water
move, although it would surely ther-
mophen hurriedly if this system
were used instead of the pump.

The third starter is the fact that
the gun is designed to be an integral
part of its carriage, which is a gas
engine propelled vehicle. Perhaps
this idea was borrowed from the
fighting airplane, in which the ma-
chine gun is rigidly mounted to fire
through the propeller.

Soldiers' Christmas Cheer.

All persons desiring to con-
tribute money toward the
Courier-Journal's Camp Zach-
ary Taylor Christmas Tree
may do so through this bank.

Funds will be transmitted
free of charge, and should be
in our hands not later than
Dec. 15. Names of contribu-
tors will be sent with the
money.

All other banks will doubt-
less do the same.

Graduate Nurses Wanted.

Four hundred and seventy-five
graduate nurses for the immediate
urgent army service are needed be-
fore Dec. 12, it was announced, and
in the course of the next year at least
20,000 nurses will be required in the
army hospitals in this country and Eu-
rope. Of the 80,000 graduate nurses
in the country only 3,500 so far have
been assigned to duty with the army.
Of these, 1,500 are in Europe.

Italians Surprise Austro-Germans in Mountain Tunnel; Trap 5,000 Men

While the Austro-Germans have consistently defeated the Italians in the recent drive along the mountainous regions of Northern Italy, there have been instances where the Italians have made brilliant rallies. This picture shows one of them. Here they found a tunnel in the mountainside which the Austro-Germans used as a short cut to the line of attack. The Italians took the enemy unawares at this point, drove them back and captured many prisoners who were caught in the tunnel. A group of Italian infantrymen are shown entering the tunnel after the retreat of the foe. The rally cut off perhaps 5,000 men and in the trap most of them died or were made prisoners.

One of Her Irons in the Fire

By ETHEL HOLMES.

(Copyright, 1917, Western Newspaper Union.)

I have always believed in marriage, domestic life, children, and all that. There is nothing of the strong woman about me. I naturally cling to something stronger than myself: I am one of those stupid creatures whom men usually prefer to women more like themselves. Why they do so I am unable to understand.

I was very fond of Charlie Owens, but Charlie was not much to cling to, and though he loved me I was unwilling to marry him because I feared that poverty would fly in the door and at the same time love would fly out at the window.

If I was stupid I had sense enough to turn Charlie down. But there my sense ended. I was bound to find someone to cling to, and since I knew no man who wanted me or I wanted, I resorted to an advertisement. Not that I condemn advertising, for I don't know anything about it, but advertising for a husband or a wife is not usually resorted to by persons of good sense.

I received two replies, one from a countryman evidently not highly educated and another from a person who by his bibliography, English and evident delicacy I judged to be a gentleman. He signed himself Emory Perkins. He said he knew by the tenor of my advertisement that I was a lady, that he was looking for a wife, and saw no reason why he should not find one through the medium of a newspaper than any other article he wanted.

Mr. Perkins and I fell into quite a correspondence. He did not seem to be in a hurry to meet me; saying that he was expecting every day to make a lot of money. It would be time enough to meet me when he could offer me a home. This looked a little as if he were one of those men with "irons in the fire," but he was too honorable to proceed with his suit until he could make me comfortable, so I did not drop him. Besides, his letters were delightful.

This was in the third year of the big war and congress had voted a large sum for aviation. All the inventors in the United States were trying to add some improvement to the air machine model which was to be copied in large numbers. One morning I read in a newspaper that someone had produced a substance very light and not inflammable, which was being tested as material for certain parts of the government airplane.

In a letter to him I inclosed the article and jokingly accused him of being the inventor referred to. He replied jokingly, asking me how I had learned his secret.

At this time Charlie Owens came to see me very seldom. This piqued me. One day on meeting him on the street I asked him why he did not come to see me any oftener. He said that he was very busy. One of the irons he had in the fire was looming up. He was not sure but that he was about to make a fortune. If he did he would have plenty of time to spend with me. I laughed at him, calling him Johnny Look-In-the-Air. He retorted that it was better to look up than to look down and hurried on.

I was beginning to despair of getting a husband and about to make up my mind to advertise for a position in which I could make my living by my own exertions, when suddenly the situation was completely altered. I saw in a newspaper the announcement that the standard model for the airplanes to be constructed for the government had been decided upon and contracts for hundreds of thousands had been let.

"Well," I remarked, "I dare say some man's iron in the fire has been turned into gold."

Sincerely had I spoken the words when there was a ring at the doorbell and the postman handed in the mail. One of the letters was from my matrimonial correspondent. I opened it and read:

"A matter of business which I have had on hand for some time—an iron in the fire," I muttered to myself—"has materialized, and in consequence, after meeting, we are suited with each other. I am in a position to offer you a home. I therefore beg that you will grant me an interview."

I caught my breath. Not that I was about to come face to face with a wooer I had never seen I drew back. All of a sudden it rushed upon me that I was about to give up the only man I loved. I hesitated, in case we should not be antagonistic, between this man who was able to provide for me and Charlie Owens, who was always looking in the air for a fortune.

Common sense prevailed over love. I made an appointment for the next evening to receive my problematical wooer.

When the doorbell rang sharply at the appointed time, it sent a tremor through me; then a footstep in the hall, and Charlie Owens stood in the doorway.

"Sweetheart," he said, "one of my irons in the fire has brought me a fortune. My airplane material is a success. I shall reap a million; will you share it with me?"

"And you are my correspondent?" I asked.

"Yes, I saw your note containing your advertisement on the table before you posted it."

One of my own "irons in the fire" has materialized. I am engaged to Charlie.

Highway Improvement

NATIONAL SYSTEM OF ROADS

Expert at National Capital Illustrates How Scheme Is to Be Brought to Successful End.

The establishment of a national system of highways is greatly facilitated by the federal aid road law, which compels all the states that would share in its benefits—and that means all of the states—to equip themselves with state highway departments. With these state highway departments devoting their attention to the building of state systems of main, through-line highways, every condition is favorable for the next and crowning act—the establishment of a national system of highways.

By way of illustrating how a national system of highways is about to be evolved by easy and logical stages, an expert at the national capital made the following statement:

"Gradually the state has made itself a compelling factor in the handling of local road problems and, as a logical sequence, the federal government, first through educational activity and later by the financial aid provided by the federal aid law, has made itself a powerful factor in the working out of the state highway problems. The next logical step follows the same course which has been pursued by the state governments, namely, the broadening of federal participation to provide for the establishment of a system of national highways."

"This policy can be put into effect without disturbance of existing organizations, without providing new means of finance and with but little change in existing laws. The process would logically take a course somewhat as follows:

"1. The state highway departments and the federal office of public roads would make an initial selection from existing state highway systems of those highways which are of interstate importance.

"2. A system thus selected would be approved by congress, with the requirement that federal funds be applied only to such system on and after a specified date.

"3. The federal aid should be extended to maintenance as well as construction, as the national system of highways should have for all time a close relationship with the federal government.

"Some of the states already have made plans for utilizing the aid granted by the federal aid road act on roads which could not properly be included in a national system. But this need

Concrete Road in Mississippi.

not cause extreme conflict, as the federal funds for the first three or four years' operation of the present act could continue to be applied as now planned. The appropriations for the first two years are already available and considerable time necessary must elapse before the national system could be laid out and made ready for the application of federal funds.

"In all probability the new scheme would come into effect as an extension of the present federal aid road act."

WHY FAMILY MOVED TO TOWN

Compelled to Make Change Because of Poor Schools and Bad Roads—Remedy for Poverty.

"Why don't they go on to a farm?" is the question with which many men dismiss from their minds the story of some poverty-stricken family. The chances are five to one that that same family was induced to move to town because of poor schools and poor roads in the country. The remedy for much of the poverty now in our towns is good roads and good schools in the country. Why should not country schools be given the same attention given city and town schools? Why should not the children be permitted to go to them over good roads with dry feet, instead of wading through mud and water? Good roads will make the country a better place in which to live.

Cull Growing Flock.

Cull the growing flock of chicks as much as possible, market all that are in any way inferior but in good health, and kill and bury all which seem weak or sickly. It will not pay to keep any but the strongest and best chicks.

Prevent Tuberculosis.

To prevent tuberculosis, all milk and milk products should be cooked before being fed to hogs. To control hog cholera use sanitary precautions and hog cholera serum treatment.

A LECTURE ON Christian Science

by
Virgil O. Strickler, C. S. B.

Member of the Board of Lectureship
of The Mother Church, The First
Church of Christ, Scientist, in
Boston, Mass.

Lecturer V. O. Strickler was heard
at the Princess Theatre Sunday after-
noon by a crowd greatly reduced by
the extreme weather.

Mr. Strickler in his lecture said:
As it becomes more generally un-
derstood that through the ministry of
Christian Science people are being
healed of sickness, sin, unhappiness,
worry, fear, and other discordant
conditions, there is an ever-increasing
desire upon the part of the general
public to learn how these results are
accomplished. It is the purpose of
this lecture to explain how Christian
Science does these things. There is
no mystery about Christian Science
healing, nor is it difficult to under-
stand. It can be stated without any
reservation whatever that every per-
son who is willing to do so may learn
how to heal sickness and to destroy
the desire to sin for himself and
others through Christian Science.

Many Different Religious Beliefs.

It is said that there are more than
two hundred different kinds of the
Christian religion alone, not to men-
tion the hundreds of other forms of
religions that are not Christian. It is
a fact that people do entertain widely
differing religious beliefs. In many
instances the differences are irrecon-
cilable, and yet every one believes
with all the sincerity of which he is
capable that his own particular beliefs
are true. It must be conceded that,
in the main, all people are equally
honest and equally sincere in their
religious beliefs. The only reason
why they are grouped together in
different forms of religion is because
they honestly believe that through
their own particular form of religion
they will find the good which they so
earnestly desire.

As one considers the subject of re-
ligion from this broad viewpoint it
becomes entirely plain that most of
the people in the world are believing
as their religion many things that are
not true.

Every one will recognize not only
the desirability, but the necessity,
of exchanging false and erroneous be-
liefs about religious matters for posi-
tive truth.

True religion consists of spiritual
truth, and not of erroneous beliefs;
hence it follows that one's religion is
limited to the amount of spiritual
truth he knows, and that erroneous
religious beliefs are only so many de-
viations that serve no other purpose
than to obstruct spiritual growth.

Christian Science aims to destroy
erroneous religious beliefs by substi-
tuting a knowledge of truth in place
thereof, and to destroy out of the hu-
man mind all evil qualities by plant-
ing good qualities in their stead. It
wages relentless warfare against all
wrong mental qualities. It seeks to
substitute love in place of hate, un-
selfishness in place of selfishness,
honesty in place of dishonesty, and
truth in place of error. It lays tre-
mendous emphasis upon the necessity
for "bringing into captivity every
thought to the obedience of Christ,"
(II. Cor. x, 5) as the Bible commands.
It shows that the cause of all disease
and sin is mental, and not physical,
and that both sickness and sin are de-
stroyed by the evangelization of the
human mentality with truth and love.
It teaches without any reservation
whatever that the truth taught and
practiced by Jesus, when understood
and applied, is sufficient without any
drugs or any material means to heal
the sick and regenerate the sinner,
and Christian Scientists everywhere
are engaged daily in demonstrating
and proving this to be true.

Every student of religion should
begin to give heed to what the Bible
teaches concerning the importance of
looking to the mental rather than to
the physical for deliverance from hu-
man discord. We read in Romans
viii, 6, 7, "To be carnally minded is
death, but to be spiritually minded is
life and peace. Because the carnal
mind is enmity against God; for it is
not subject to the law of God, neither,
indeed, can be." Again in Philippians
ii, 5, it is said, "Let this mind be in
you, which was also in Christ Jesus;"
and in Romans xii, 2, "Be ye trans-
formed by the renewing of your
mind."

These significant statements from

the Scriptures leave no room for
doubt as to the cause of sin, disease,
and death, or their cure. The carnal
mind is nothing more nor less than
the unregenerated human mind. It
is the human mind in its natural state,
when filled with hatred, selfishness,
deceit, dishonesty, and other evil
qualities, and with superstition and
false beliefs. These evil and errone-
ous mental qualities result in sin, dis-
ease and death, and in all human
discord.

The command is to get rid of er-
roneous mental qualities, and to have in
us "the mind which was also in Christ
Jesus," for in this mind there was
not a single sinful quality, nor any
superstition or false religious belief.
Thus the human mind is renewed by
the destruction of erroneous and sin-
ful mental qualities, and the substitu-
tion in their place of qualities that
inhere in the Mind of the Master.

As this renewing process goes on,
sickness, suffering, and discordant
conditions begin to disappear, and
when it is finished, and every mortal
thought has been brought into sub-
jection to Christ, then man will be
transformed from a sinning, suffer-
ing mortal into a state of peace and
harmony. The carnal mind with its
sin and superstition produces the
conditions that lead to death, while to
be spiritually minded, that is to have
the Mind that was in Christ Jesus,
"is life and peace." Christian Science
teaches that this is the precise pro-
cess by which human beings are
saved from sickness and sin.

It will thus be seen that Christian
Science healing in every case is spiri-
tual, and results from the operation of
Truth or divine Principle in human
consciousness, and not from the ac-
tion of one human mind upon another,
nor from hypnotism, nor from men-
tal suggestion.

To summarize the matter in a single
sentence, it can be said that Christian
Science healing is accomplished
through the activity of right thinking
and right living, and in no other way
can one demonstrate the Principle that
heals.

Jesus healed the sick without drugs,
and, what is more important to us, he
taught other people how to do so, thus
proving that his method of healing
physical diseases by spiritual means
could be taught to others, and under-
stood and practiced by them.

As the disciples walked up and
down the country with Jesus listening
to his explanations of spiritual truth,
and watching him apply this truth to
human needs as he healed the leper,
the lame, the deaf, the blind, whom
he met by the wayside, they began to
understand for the first time that di-
vine love is adequate to meet every
human need, and that Jesus came to
teach the way whereby every one
might learn to prove it.

Moses and the prophets also healed
the sick and raised the dead and did
many other wonderful works in dem-
onstration of the power of the Spirit
to meet human needs, and the Old
Testament is filled with such instan-
ces.

It will thus be seen that the knowl-
edge of spiritual truth, and the meth-
od of its application to deliver people
from sickness, sin, and every kind of
evil human condition has reappeared
upon the earth at many times, and it
is claimed for Christian Science that
it is the reappearance in our own gen-
eration of the understanding of the
same spiritual law that was known
and understood in part by Moses and
the prophets, and which was perfect-
ly understood and demonstrated by
Jesus, and by him taught to the dis-
ciples. There is no mystery about it,
and the results produced by Christian
Science are the results which have
always followed and must necessarily
follow, from the apprehension and de-
monstration of spiritual truth. Chris-
tian Science is nothing more nor less
than a return to primitive Christiani-
ty, and every one who turns to it
fairly and honestly will find it that
which will satisfy his spiritual aspira-
tions and meet his human needs.

Mrs. Eddy's Discovery.

Mrs. Eddy is acknowledged to be
the Discoverer and Founder of Chris-
tian Science, and many people ask
what it is that she has discovered. In
reply it can be said that she has dis-
covered the law of Spirit which is
spiritual truth.

Mrs. Eddy also studied the miracles
in the Old and New Testaments, and
came to the inevitable conclusion that
all of these events were correlated by
means of an underlying spiritual law
that had been known and understood
by the men who wrought them, and
she said that if she could discover the
law it would be found to operate in
the same manner now as in Bible
times; that it would be a healing law

and would now heal people of sick-
ness and sin and every evil human
condition the same as then.

This idea grew and expanded in her
consciousness until it became the im-
pelling motive of her entire life. In
the year 1866 she discovered the law
of Spirit, and named it Christian
Science. After waiting nine years,
during which time she subjected the
Principle she had discovered to the
broadest practical tests in healing
sickness and other forms of human
discord, she published a statement of
Christian Science in a book which she
entitled "Science and Health with
Key to the Scriptures." This book is
everywhere now recognized as the
only text-book of Christian Science.
A great religious movement has form-
ed around its teachings; which in one
generation has girdled the earth with
its churches. The spread of Christian
Science has been phenomenal, and its
growth has resulted from healing.
Every adherent of Christian Science
has actually been healed by some
sickness, disease or sinful appetite,
and most of them have been healed of
many such conditions. These facts
are easily verified, and are worthy of
very serious considerations.

Spiritual Law.

Mrs. Eddy discovered the law of
Spirit as truly as Sir Isaac Newton
discovered the law of gravitation, and
this fact should be thoroughly under-
stood. Just as Newton discovered
that movements of material bodies
are regulated and governed by this
material law, so Mrs. Eddy discover-
ed the Principle that governs the en-
tire universe, including every detail
in the lives of men. The supreme
creative governing, omnipresent Mind
or Principle is God, the only cause,
the only creator, the only Ruler of
man and the universe.

Source of Good and Evil.

Outside of Christian Science very
few people have ever reasoned out
the question to their satisfaction as
to where good and evil come from,
and still fewer have even a satisfacto-
ry theory as to how good may be se-
cured or evil avoided in actual human
experience.

Christian Science shows that all
good comes to man from God through
the operation of His laws, and that
evil originates in the human carnal
mind, which is "enmity against God."
Evil is not an entity. It has no king-
dom and no king. It has no mind,
no presence, and no laws. The only
power it can ever exercise is what it
derives from human belief in it, and
human acceptance of it.

Since God is infinite good He has
knowledge of good and of nothing
else. He could not possibly have
knowledge of evil, for evil does not
exist in the spiritual universe, and it
is really the only universe. The seem-
ing existence of evil is in the carnal
mind. It has been well said that if
every one would quit sinning there
would be no more sin. As human
consciousness is evangelized by truth
and love, sin disappears.

There is no such thing as an angry
God waiting to smite you for sin, for
God has no knowledge of sin in any
form. His law is against sin; yet the
punishment for or of sin is by sin,
and when the sin is destroyed and
put away out of the human mind, the
punishment stops, but as long as the
sin remains it will whip and punish
the sinner.

Thus the forgiveness of sin consists
in the destruction of sin, and the sin
exists nowhere but in the carnal
human mind. The belief that God
pardons sin merely because you ask
Him to do so, without turning from
that sin yourself and putting it away
from you, is foolish deception.

People ask how God can destroy
sin, when he knows nothing of sin
and does not even know that it ex-
ists. The answer is plain. He de-
stroys it just as the sun destroys the
darkness which it never sees. When
the light appears darkness disappears.
Good and evil cannot mingle any
more than light and darkness can
mingle. One vanishes before the
other.

Cause and Cure of Disease.

All sin, disease and death came from
the belief of life, intelligence, sensa-
tion, and substance in matter. If it
be true, and it now seems to be set-
tled, that there is no life in matter,
that it has no sensation or intelligence,
and is, not substance, then it follows
that all material theories concerning
disease, and the method of solving all
human problems, will have to be
changed from a material to a spiri-
tual basis. If matter is itself merely
a thing of thought objectified,
in whatever form, is also merely the
objectification of diseased beliefs up-

Political Questions.

When were the President and Vice
President of the United States from
different political leaders?

What is the total number of votes
in the 1917 Electoral College?

What men were three times nomi-
nees for the Presidency of the United
States, and but twice elected?

Which President of the United
States died in office?

Name the Presidents of the United
States who served less than one term?

Which state since 1880 has always
given its entire electoral vote to the
Republican nominee for the Presi-
dency?

Name the Presidents of the United
States who served but one term.

Which Presidents of the United
States were previously Vice Presi-
dents?

In which State since 1880 have elec-
toral votes at a national election been
given to the nominees of three par-
ties?

When and in what state would a
change of 575 popular votes have given
the Presidency of the United States
to the candidate defeated at that elec-
tion?

Which President of the United
States received votes in three Elec-
toral Colleges, but never a sufficient
number to elect?

During the administrations of which
Presidents has there been no Vice
President of the United States?

Girl Cremated.

Hall's Family Pills for constipation.

on the human body, and that such be-
liefs originate in the carnal mind, and
not in the body, but are manifested
on the body only after they are for-
mulated in the material or carnal
mind. If this be true, and it is true
beyond all possible question, it then
follows that the correct way to treat
disease is not through matter, nor by
giving material remedies and drugs to
the body, but by destroying the im-
ages of disease out of the human
mind.

Every one must see at a glance that
disease is not itself an entity. It
has no mind, intelligence, volition,
nor presence. Disease is neither self-
created nor was it created by God.
It originates in the first instance in the
carnal human mind in the form of dis-
ease thought, and is then objectified
on the body by the material beliefs of
that same carnal mind. The true way
to cure it, therefore, is to give to the
mind something that will neutralize
and destroy the disease producing
qualities and belief. The thing that
does this is the Christ-truth, which
Christian Science brings to the human
and in this way Christian Science has
healed very many people from all
kinds of disease.

Jesus said, "Come unto me all ye
that labor and are heavy laden, and I
will give you rest," and Christian
Science is teaching the human race
that the true way to come unto Him is
to live the Life that he lived, to mani-
fest the Love that he manifested, and
to demonstrate the Truth that He
taught. In this way it has helped
many people to find rest, and peace
and health.—Advertisement.

Keep It Handy

Ward off attacks of grip,
colds and indigestion by timely
medication with the thoroughly test-
ed and reliable remedy of the Ameri-
can household.

PERUNA

It's better to be safe than sorry.
Many a long spell of distressing sickness
might have been prevented if this proved
remedy had been resorted to in the first
stages. Any article that has been efficiently
used for nearly half a century has proved
its value. Tablet form if you desire it.
At your druggist.

Jas. Benson, aged 21, was accident-
ly shot and killed by his room-mate,
Philip Fuqua, who was fooling with a
pistol, at Russellville.

What Shall I Give?

A gift of Jewelry will not disappoint, for it is something every-
body likes to have. The offerings here will soon help you to solve
that problem of "What to Give?" You'll be surprised at the lowness
of prices, too.

We ask you to visit this store, whether you buy or not—see the
goods; compare values with others here in town or outside. Note
what little prices can do toward buying something real serviceable
and pleasing.

**You Can Buy a Gift of Real Individ-
uality and Distinctiveness For as
Low as 50c---\$1.00 and Up.**

Excellent values are offered in the following articles, and upon
inspection you'll readily recognize their worth and dependability.

For Women and Girls

Diamond Rings, Plain Set Rings,
Birthmonth Jewelry, Dinner
Rings,
Silver Novelties, Umbrellas,
Pearl Jewelry,
Diamond Set Jewelry,
Bar Pins, Handy Pins, Collar
Pins,
Lavalieres, Brooches, Crosses,
Wrist Watches and Bracelets,

York Mother Finds Ideal Cold Treatment For Her Little Boy

Nothing to Swallow—You Just Rub It On.

Mothers everywhere will be interested in the experience of Mrs. Chas. Smith, 623 West Gas Alley, York, Pa. Mrs. Smith tried the Southern remedy—Vick's VapoRub Salve, when it was first introduced in York, and writes—

"Our little four year old boy had a cough for about a week. We gave him everything we knew, and nothing seemed to do any good. So when we got Vick's VapoRub I rubbed it on his chest well for two nights and I have not heard him cough since. I think it is the best medicine I have ever had in the house."

Vick's VapoRub comes in salve form, and when applied to the body heat, the ingredients are released in vapor form. These vapors are inhaled with each breath, opening the air passages and loosening the phlegm. It's a real "Bodyguard in the home" against all forms of cold troubles. 25c, 50c. or \$1.00. At all druggists.

RALPH I. SMITH (4 YEARS OLD)

Keep a little BODY-GUARD in YOUR home
VICK'S VAPORUB SALVE

Weather For Week.

Washington, Dec. 10.—Weather predictions for the week beginning Sunday, issued by the Weather Bureau are: For the Ohio valley fair and cold.

Told of Relations.

The story of his relations with Miss Harriet A. Varney, a nurse, who is on trial charged with the murder of his bride of eight months, was recited on the witness stand by George H. Keyes, husband of Mrs. Pauline H. Keyes, who was shot to death in their Brooklyn home on June 19.

Something In a Name.

A healthy drafted man was discharged from military service at Camp Zachary Taylor in place of a man recommended to be sent home as physically unfit, because of an error through the similarity of names. Camp authorities are anxious to get the healthy man returned, but lawyers advise that this is impossible as he is now exempt and immune to the draft.

Thaw Gets One.

Paris, Dec. 10.—Maj. William Thaw of the Lafayette Escadrille, brought down a German airplane in a duel over the enemy's lines on Wednesday.

NEED MORE WAR IMPLEMENTS

Inventors Have Unlimited Opportunities to Think Out Death-Dealing Machines for Government.

The statement is often made that the war has developed no invention of military value. This, of course, is nonsense, says the Illustrated World. Trench periscopes, gas bombs, liquid fire apparatus, low visibility stripping for warships, microphones, detectors for use on submarines, seismographic detectors for hidden battery locations, synchronism for rapid fire guns and battle plane propellers, the perfection of the submarine itself, are all examples.

There are a thousand little inventions needed to help in ending the war—things you or I might invent, if we knew how.

For instance, a gun sight as efficient as the telescope and as easy to use as the open sight. A telescope that can see around a corner. A wireless field phone as efficient as a wired phone, a gas as deadly as chlorine and as invisible as air which can be cheaply and quickly produced and projected, ear protectors which save men from the effects of heavy gunfire without preventing ordinary hearing, a means for detecting the presence of submarine mines without getting blown up in the process, a searchlight which will project heat as efficiently as present ones do light—imagine what such a device would mean in protection from aerial raids. Imagine a searchlight beam two miles up in the air hot enough to set fire to anything it played upon.

On such problems as these inventors may work with the full knowledge that if they really discover something worth while they will do an incalculable good to humanity and, incidentally, feather their own nests to the limit of their desires.

MEAN

Miss Oldgirl—When I wouldn't give him a decided answer to his proposal he asked me if I couldn't learn to love him.

Miss Caustique—Why don't you try? One is never too old to learn.

STALE EGG STARTED RIOT.

A stale egg caused a riot at Portland, Ore., the other day. Two men were moving furniture, when a practical joker threw an egg at them. He missed the men, but hit an upholstered chair, leaving a splash of yellow upon it. The owner of the furniture then seized an ax, and ran at an innocent stander-by. He seized a stick, in defense, and presently the fight became general, bricks being freely thrown. Eventually two policemen quelled it by using clubs.

PROBABLY WON'T.

"I was just reading about a cottage in England that has been occupied by one family for 600 years." "The landlord ought not to kick on papering it in the spring."

TO BUY OFF BONDS.

Mrs. Exe—John, I loaned our colored cook some money to get her worthless husband out of jail. Exe—A liberty loan, eh?

BOYS AND GIRLS.

Mutt—Boys will be boys. Nutt—What about girls? Mutt—Oh, they have to be what ever fashion dictates.

THE DIFFERENCE.

He—Do you know, I generally dance on an impulse. She—You didn't last night; you danced on my feet.

A COINCIDENCE.

"There is a famine just now in stenographers." "Queer, and a plethora of dictators."

Horrors Increased

A fierce blizzard sweeping devastated Halifax, forcing rescuers to abandon their work, added to the stricken city which also is in darkness and with only one wire of communication with the outside world open Saturday.

This threatens to snap any moment. The prompt arrival of relief trains with nurses, doctors and sorely needed supplies also was menaced by the storm. Identification of the dead is proving exceedingly difficult. No change has been made in the estimate of 2,000 dead and 3,000 injured.

Looking Ahead.

The American Society of Mechanical Engineers is expected to bear the brunt of training crippled soldiers in profitable occupations and solving industrial problems in America brought about by the introduction of woman workers.

Jackson-Amoss.

Relatives and friends here have received invitations to the marriage of Mrs. Martha Bronaugh Amoss, formerly of this city, to Mr. Emmett Urey Jackson. The wedding will take place at the home of the bride's grandparents, Mr. and Mrs. Cyrus Marsh, at Ashland, Va., Wednesday December 12. After January 1 Mrs. Jackson will be at home at Burkesville, Va.—Pembroke Journal.

Accept Annistice.

Rumanian troops have decided to join the armistice, although they have rejected all attempt at fraternization. The announcement is made officially from Jassy. Hostilities have been suspended on the whole Rumanian front, it is stated.

Hen Turkeys, 8 lbs. and up, per pound.....	21c
Green Hides, Horse Hides, Tallow and all kinds of Furs at market prices	

Tom Turkeys must not weigh under 12 pounds and Hen Turkeys under 8 pounds. See, phone or write us before you sell.

Yours Truly

HAYDON PRODUCE CO.

A Scheme That Failed

By ELINOR MARSH

(Copyright, 1917, Western Newspaper Union.)

Ben and Jim Coverdale were twin brothers and thought of an old and very respectable family, were poor.

An uncle in South America died and left them a coffee plantation. The request was made with the provision that they live on the property and develop it. It was not worth much, but might be made valuable.

Ben was disposed to try a business scheme at home and forfeited his share of the inheritance by remaining where he was. Jim took up the property in South America.

Ben lived with a widowed sister, who soon after died, leaving her brother a little four-year-old girl.

At the age of fifteen the girl, Adele Weatherly, became her uncle's housekeeper. There was a sincere affection between uncle and niece, the relation between them being more like that between father and daughter.

When Adele was seventeen years old her uncle paid some attention to Miss Mildred Conyngham, a young lady of the fashionable set.

When Mr. Coverdale was about fifty years old he fell ill. Miss Conyngham visited him frequently and sent delicacies. He was devotedly nursed by Adele for months, when unfortunately she also fell ill. It was then that Miss Conyngham betook herself, bag and baggage to the Coverdale home to care for the invalids, not waiting for an invitation or even their permission.

Both invalids were ill a long while and Miss Conyngham was unremitting in her attentions to them.

Meanwhile Jim Coverdale in South America had prospered.

The only knowledge of Jim Coverdale's growing wealth that ever reached his native town came in this wise: A man who had been in South America met Miss Conyngham and she asked him if he had ever seen or heard anything of a Jim Coverdale living in Brazil?

"Yes," was the reply. "I have been on his plantations."

"His plantations?"

"Yes, I suppose he has a dozen of them. Jim Coverdale is an enormously rich man."

At this point of the story several important matters connected with it occurred very near together. Jim Coverdale sold out his property in Brazil and left for his former home in the United States. Before his departure he made a will leaving all he possessed to his brother. This will he sent, by a different steamer from the one on which he sailed, to his brother's lawyer, John Williams, with instructions to say nothing about it. The ship on which Jim Coverdale sailed was lost in a storm and all on board went down with her.

Ben Coverdale died a month after the arrival of the will, but he never knew of his inheritance. Then came news of the shipwreck and Jim Coverdale's name in the list of passengers.

When Ben Coverdale's will was opened it was found that his small property was left to Adele.

When Miss Conyngham heard of the death of Jim Coverdale she felt certain he had left his property to his brother, Ben. Hearing of Jim Coverdale's death, Mr. Williams opened the will and announced to Adele that she was the owner of a princely fortune.

Then came Miss Conyngham with a statement that Ben Coverdale had told her that in a codicil to his will he had left her a third of his property.

The fact was, Miss Conyngham knowing that Jim Coverdale was rich, that he was dead and had doubtless left his property to his brother, tried to induce Ben Coverdale to marry her. Failing in that she used all her energies to induce him to leave her a portion of his possessions. Coverdale, finally yielded and sent for his solicitor.

When the will was admitted to probate it was evident that something had been torn from it. This soon became a matter of general knowledge and immediately the friends of Adele Weatherly and those of Miss Conyngham were pitted against each other.

Up to this time the contents of James Coverdale's will were unknown to anyone but Adele and the attorney, who had it in his keeping.

For a time neither admitted nor denied that any codicil was attached to the will. Later the attorney acknowledged that there had been a codicil and that it had been torn off, but this admission was made only to Miss Conyngham. She was assured that she would not be benefited by its production and she was advised not to compel him to produce it.

This was the end of the matter till the case came into court and Mr. Williams was called upon to state if the will had been mutilated. He produced the will and a fragment, which he showed had been torn from it by the jagged edges of each paper which fitted into the other. Then he proceeded to read the fragment:

"To be left attached to this will only in case Mildred Conyngham attempts to claim any of my property. She took advantage of my illness and that of my niece to come into this house unbidden and tried to dominate both of us. She has attempted to force me to marry her. This I will not do. I have endeavored to induce me to leave her a part of what I possess. What her object has been in this I cannot conceive, for I am a poor man."

That was the end of Mildred Conyngham's scheme.

FARM ANIMALS

COLD RAINS INJURE HORSES

Exposure of Young Animals to Severe Weather Causes Shrinkage and Retards Development.

The exposure of young horses to the short spells of severe weather which occur frequently during the fall, causes a shrinkage in live weight and is a hindrance to rapid economical development. Older horses seem to stand this sort of treatment with less loss. It is doubtless true that animals become accustomed to winter weather, but frequent changes from fine fall weather to had storms retard gains in colts without shelter.

Four yearling Percheron fillies with an average weight of 1,169 pounds on pasture, with a ration of six pounds of corn and oats (one-half of each by weight) daily shrunk an average of 52 pounds each during the spell of severe weather on October 18 to 20 at the University of Missouri. Aged mares in foal, lost only slightly during the same period.

Inexpensive sheds which will protect colts from wind, rain, sleet and snow will prevent part of such loss in weight. Growing horses should not be housed too closely and prevented from taking plenty of exercise, but they should not be subjected to extremely bad weather if they are expected to make satisfactory growth.

DEVICE FOR HOLDING SWINE

Contraption Is Simple and Cheap in Its Construction—Illustration Explains Fully.

The device shown in the accompanying drawing is simple and cheap in its construction and easy to operate—so simple, in fact, that the mere illustration

Easy to Hold Hogs.

tion furnishes all the specifications necessary, says Farm Buildings. The uprights should be firmly set in the ground and the upper piece of stocks pinned to the upright on a pivot at A. By nailing boards to the uprights on both sides in the rear a small chute may be formed by means of which the hogs may easily be driven into the "trap."

CARING FOR FEET OF SHEEP

Neglect Often Brings Troubles Later On—Practical Plan Outlined for Needed Attention.

Neglect of the feet often brings sheep troubles later on. Uncared-for feet are favorable breeding grounds for foot rot and crooked pasterns. Try this plan: Turn the sheep out in pasture while the grass is wet. This will clean the feet and soften the hoof. After a few hours pen the sheep, take a hoof clipper or pruning knife and remove the surplus hoof or crooked portions. Trim so that the horn is on a level with the sole of the foot. If paring is necessary more on one side than the other in order to balance the foot, do this. Aim to have a level foot when the sheep stands on the ground.

COLLAR FITTED TO A HORSE

One That Is Too Large Should Not Be Put On Animal in Hope That He Will Grow Into It.

A collar should be fitted to the horse, and not the horse to the collar. The collar that is too large should not be used on a horse in the hope that he will grow large enough so it will eventually fit. A collar that fits well in the spring may not fit at all in the fall.

PROPER ALLOWANCE FOR SOW

Amount of Feed Given May Be Governed by Her Appetite—Tankage Should Be Fed Sparingly.

The amount of feed given a sow may be governed largely by her appetite. Tankage should not be fed to exceed more than 5 per cent. Corn may make up half the ration, as it tends to prevent the sow from becoming thin.

SHORT PASTURES FOR SHEEP

Brushy Field on Almost Every Farm Where Animals Can Be Made to Return Good Profit.

Sheep keeping should be encouraged. No other animal can thrive on such short pasturage as the sheep. Sheep manure is the most valuable of all. On almost every farm there is a brushy field on which sheep could browse eight months of the year.

BIG AREAS ARE REFORESTED

Scheme Carried Out Successfully in France Impracticable in Mississippi Valley, Say Engineers.

In connection with flood-control agitation, more or less attention is being drawn to the subject of reforestation, says Popular Mechanics Magazine. While this plan, according to some engineers, is manifestly impracticable so far as its application to large streams like the Mississippi or Missouri rivers is concerned, in some cases it undoubtedly does have a certain value.

In the mountain regions of France and Germany the scheme has been employed, and an interesting example is afforded near the headwaters of the Ubaye river in the lower Alps. The work was commenced in 1887 when the mountainsides were entirely bare. Masonry barrages were constructed at frequently intervals to catch silt and check serious erosion. The mountains were then retimbered. Today, instead of being a bleak, barren waste as in former times, this district is covered with trees.

Since the land in this instance has little agricultural value, the chief objection to reforestation cannot be raised. In all, according to the latest figures obtainable, France has retimbered 629,488 acres.

But to reduce the height of flood waters at Memphis, merely from the stage reached in 1912 to that of the next highest record, the reforestation of 566,000 square miles of the upper valley's most fertile land would be required, according to the president of the Mississippi river commission.

OH! PITY!

"What did Percy do when Vivian wifed him outright?"

"Went right home an' had a good cwy."

PAINFUL SUBJECT.

"Count, would you love me just as much if I had no money?"

"How can you ask such a question, my adored one?"

"Oh, it's due to idiotic curiosity, I suppose."

"Please do not harrow my feelings so. The thought of you being without money is more than I can bear."

BETTY'S DESIRE.

Betty asked her mother if she was going to the club today. Being told her club did not meet that day, Betty said: "Please, mother, go to some club today."

"Why, Betty?" asked her mother.

"Oh, so grandpa will come and take care of me."

ALUMINUM FUMES INJURIOUS.

According to a French physician, the fumes from aluminum factories not only are destructive to vegetation but they also cause a form of diabetes to workers in them.

WHEN THINGS ARE FREE.

"Hey, Frosh, want a locker?"

"How much are they?"

"They're free."

"Gimme two."—Longhorn.

ADAPTING ADAGES.

"You can't eat your cake and have it, too."

"No, and you can't be independent and keep your cook."

LOVE IS BLIND.

The Bride (at the second breakfast)—Tea or coffee, dear.

The B'groom—Don't tell, love. Let me guess.

POOR BOOB.

Boas—He exaggerated his salary—and so she married him.

Claire—See what a man gets for lying.

Offer Good in December, ONLY!

Lost His Sweetheart.

Harold, aged five, was visiting his aunt in the city, and the little girl next door was his sweetheart till one day when she came over with her little pink rompers on. Mortified, Harold said: "Why don't you go home and get a dress on; I don't want you to be a boy."

Children Cry FOR FLETCHER'S CASTORIA

In Confidence.

Sometimes a girl gets confidential and tells a man that a lot of other men have tried to kiss her, but he is the only one who succeeded.

A lazy liver leads to chronic dyspepsia and constipation—weakens the whole system. Doan's Regulets (30c a box) act mildly on the liver and bowels. At all drug stores.—Advertisement.

Guatemala is cosmopolitan. Guatemala is the most cosmopolitan of countries. Although little more than half the size of Great Britain, no fewer than 15 different languages are spoken by its inhabitants. An official proclamation, containing a declaration in each one of these tongues, is a very cumbersome-looking document. The capital of the country—a handsome city of the same name—is laid out in modern lines, with wide streets and lovely avenues of trees, the houses nearly all being of one story only.

HOME-GROWN SEED IS THE SUREST AND BEST SELECT SEED CORN

ENOUGH FOR TWO YEARS

For 1918 Plantings and to Insure Adapted Seed for 1919

START RIGHT==NOW!

WHERE?

In the field from standing stalks of a variety that has "made good" and [be- come locally adapted.

HOW?

Pick best ears from plants showing best yields in fair competition with neighboring plants. Storm-proof plants with hanging ears give best seed. Long ears with large, uniform kernels are the best. Avoid sappy ears heavy with water.

Insure a Right Start for Your Next Two Corn Crops by Saving Ample Seed Now

For Further Information Ask Your County Agent, or Write for

Farmers' Bulletin 415, "Seed Corn"

U. S. DEPARTMENT of AGRICULTURE, Washington, D. C.

WHY?

It pays. Field selection of seed corn is one of the surest and best paying operations on the farm. Proper care of seed corn pays well. Tests show that properly cared for seed corn has yielded eighteen bushels more per acre than crib-stored seed from the same field.

KILL THE CHILL

These cool mornings by using a Gas Heater to take the edge off the room.

We have the famous "Hot Spot" heaters. None better. A call at our office will convince you.

Kentucky Public Service Co. INCORPORATED.

THE THRICE-A-WEEK EDITION OF THE NEW YORK WORLD

IN 1917
Practically a Daily at the price of a Weekly. No other newspaper in the world gives so much at so low a price.

The value and need of a newspaper in the household was never greater than at the present time. We have been forced to enter the great world war, and a large army of ours is already in France. You will want to have all the news from our troops on European battle-fields, and 1918 promises to be the most momentous year in the history of the universe.

No other newspaper at so small a price will furnish such prompt and accurate news of these world-shaking events. It is not necessary to say more.
THE THRICE-A-WEEK WORLD'S regular subscription price is \$1.00 per year, and this pays for 156 papers. We offer this unequalled newspaper and the

HOPKINSVILLE KENTUCKIAN (Tri-weekly) together for one year for \$2.65. The regular subscription price of the two papers is \$3.00.

It Wasn't His Fault.
One youngster in school had delivered a severe kick in the stomach to another lad. When taken to task as to why he had struck his playmate there, he said: "I didn't mean to hit him there, but he turned around just in time."

All in Family.
Bobby was seated in the reception room of a hospital awaiting his mother's return from the bedside of a friend. A nurse in passing asked him if he had a good time playing out of doors these fine days. Bobby looked wistful and said there weren't many children in their neighborhood. The nurse asked: "Haven't you any brothers or sisters?" To which Bobby replied, "Oh, yes, but they live with us."

Probably True.
Misses—"You say you can't read, Norah. How in the world did you ever learn to cook so well?" New Cook—"Shure, mum, Ol' lay it to not bein' able to rade th' cook books."

REPUTATION
Unyielding adherence to principles gives character to a financial institution and safeguards the interests entrusted to it; but it is the individual method employed in business dealings which distinguishes a bank and establishes its reputation. We are proud of ours.
FIRST NATIONAL BANK
Of Hopkinsville, Ky.

To Be of Real Assistance.
Spinoza's test in the Scriptures of Humanity: He who desires to assist other people will avoid referring to the voices of men and will take care only sparingly to speak of human impotence, while he will talk largely of human virtue or power and of the way by which it may be made perfect, so that men being moved, not by fear or aversion but by the effect of joy, may endeavor as much as they can to live under the rule of reason.

Argumentative Woman.
The argumentative woman is a social blight and an enemy to her own charm, she otherwise as attractive as it is possible for a body to be. Argument in itself is a dignified mental process—one absolute necessity for the world's intellectual development, but it ceases to be a thing desirable when it enters every-day verbal intercourse more than an exceedingly rare every so often. Plain common sense should tell us the reason why.—New York Evening Telegram.

Children in Japan.
Japan prizes her children as her greatest asset. She seeks to instill the beauty and the joy of life into their souls. She aims to develop their bodies and their minds to the rhythm of happiness and not under the rod of a rigid discipline.—Exchange.

Male Wasps Not Hardy.
There isn't a male wasp in existence when winter ends. Late the preceding fall the wasps mate. The coming cold weather kills every worker and male, while Mrs. Wasp hies herself to a convenient place and hibernates, ready to come forth in the spring and lay eggs to replenish the race.

TIRED, WORN-OUT AND MISERABLE.

Many Hopkinsville People In This Condition.

There is little rest for many a kidney sufferer. The kidneys feel congested, sore and painful. The sufferer, tired, worn-out; depressed.

Weak kidneys need quick help—Need a special kidney remedy. Doan's Kidney Pills have stood the test.

Have proven their merit to thousands of kidney sufferers. Can any Hopkinsville reader doubt this evidence?

Mrs. D. D. McMath, 221 Bryan St., Hopkinsville, says: "My kidneys were weak and acted irregular. I felt dull languid and nervous, dizzy headaches. A friend recommended Doan's Kidney Pills and I bought some. Their use, as directed, helped me in every way. My general health improved and my kidneys were once more in a normal condition."

Price 60c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. McMath had. Foster-Milburn Co., Prop., Buffalo, N. Y.—Advertisement.

Children Cry FOR FLETCHER'S CASTORIA

Something Not For Sale.

During the opening of the Kolb & Howe jewelry store this week a lady who entered was met by one of the young lady assistants who smilingly said:

"Madam, can I show you something?"
"No, I guess not," was the reply, "I want to see Mr. Kolb."
"Oh, I can show you Mr. Kolb," was the quick rejoinder, "but he is not for sale."

Well Answered.
Old Lesterich, an uncomplimentary husband, who used to appear in the Austrian paper Floh, said to his wife: "If nature had made me an ostrich, perhaps I could eat your cooking."
"That would be fine," answered his imperturbable wife. "Then I could get some plumes for my hat."—Christian Register.

The Better Fighter.
"Do man who admits dat he kin be scared," said Uncle Eben "generally puts up a better fight dan de man dat's allus bluffin' 'bout what a hero he is."

Keep Hands Off Wounds.
A wound should never be touched with the bare hands. It is better to cover it up just as it is rather than to run the risk of introducing another colony of perhaps even more dangerous germs. If possible, however, the wound should be washed out with an antiseptic solution. If water is to be used, it should have been boiled at least ten minutes, as simply bringing it to the boiling point will not kill the germs.

BOXES REQUIRE MUCH WOOD

Lumber Men and Mills Have Big Job to Provide Containers for Apples in Washington.

Some idea of the important bearing the lumber industry of the state of Washington has on the fruit industry may be gained from the fact that in this state alone there are required annually 12,000,000 apple boxes, to say nothing of the other fruits and the packing cases for canneries output, says the Spokane Chronicle.

Each apple box contains 4.3 board feet of lumber, or 51,600,000 feet are required annually to box the apples of the state.

It takes a large, well-equipped mill to cut 100,000 feet a day and an army of workmen in the woods to keep logs supplied. Such a plant running every day, single shift, could not furnish enough lumber in a year.

The value of the logs used, just as they are delivered into the water, would range from \$350,000 to \$500,000.

With this in mind many of the box manufacturers are urging the standardization of a box that will eliminate the large percentage of waste which now takes place. Except in rare cases the box manufacturers must purchase from the sawmill lumber cut on a 12-inch basis, with the result that outside of every box factory will be seen huge piles of narrow strips which are ripped from such lumber to meet the dimensions required under the present custom.

PAYS TO CHANGE SUBJECT

Discussion of Pleasant Things Far More Interesting Than Talk of Gloomy Happenings.

A few weeks ago I met a man, writes a great literary light in England, who immediately after making the polite salutation, commenced a recital of his troubles of that day. He caressed his troubles so that he magnified them, and there seemed no happiness for him except in remembering them and dwelling upon them.

After more than half an hour of listening to his tale of woe, I thought he had gone far enough with these messages of misery, so I interrupted him with the remark, "Now tell me some of the good things which have happened to you today." It took him a minute or two to start, but with encouragement he brought out many favorable happenings with favorable surroundings. His mood changed very quickly.

If we must keep our minds on something, and talk about something, why not choose the happier and brighter things? They are much more interesting.

WOMAN INVENTS FENDER.

To a woman inventor, Mary I. Iverson of Beverly, Mass., the Scientific American gives credit for having designed a practical fender for street cars, which remains permanently in place. The fender is made up of stout rods, and is permanently fastened to the car dash by welding or other means. Extending from beneath one doorstep completely around to the other doorstep, this fender makes it practically impossible for any article to get under the car wheels.

SUSPICION.

"You suspect the new waiter of being a German agent?"

"Yes. The other used to receive a tip with polite gratitude. This one acts as if he were collecting an indemnity."

WHERE MEN ARE SCARCE.

Maud—The vicar says there is no marrying in heaven.

Mabel—Of course not. Wouldn't be enough men to go round.

THAT'S DIFFERENT.

"That fellow has been rejected four times."

"Trying to enlist?"

"Trying to get married."

IT IS TO LAUGH.

"Once in a while I get a good laugh out of the news."

"For instance?"

"Like this drop in coal of five cents a ton."

JUST SO.

"I see the Alaskan Indians use frozen fish as legal tender."

THOUSANDS OF RATS KILLED

Campaigns Against Rodents in Various Sections of Country Result in Great Slaughter.

A vivid realization of the multitude of rats which thrive as parasites on man's industry may be gained from the results of local campaigns against them, announces a health bulletin. In 1904 a plague of rats occurred in Rock Island and Mercer counties, Illinois, and during the month ending April 20 one man killed 3,445 on his farm.

During the campaign of the public health service against the bubonic plague in San Francisco from 1904 to 1908, inclusive, more than 800,000 were killed; and in New Orleans during 1914 and 1915, 551,370 were destroyed.

During the winter and spring of a single year more than 17,000 rats were killed on a rice plantation containing 400 acres in Georgia, and by actual count 30,000 were killed on another plantation containing about 1,200 acres. On a farm of about 150 acres on Thompson island, in Boston harbor, 1,300 occupied rat-holes were counted and other rats were living about the farm buildings. At a large meat-packing establishment in Chicago from 4,000 to 9,000 have been killed yearly.

LOCUST IS GOOD FOR SHIPS

Timber Is Being Converted Into Pegs and Nails for Use in Wooden Craft Under Construction.

Representatives of wooden shipyards on the Pacific coast have been buying up the locust trees east of the Cascade mountains to use the wood for nails and pins in the wooden ships.

Workmen in the employ of the buyers cut down the locust trees, chop them up, take away the stuff they wish and leave the remainder on the ground. The shipbuilders use the locust wood because it is strong and does not decay. The farmer in the irrigated country grows the locust because it is the most beautiful of all the fast-growing trees.

The locust was formerly a favorite shade tree in eastern cities, but it is no longer permitted to be planted there because of a boring insect which destroys it. On the Pacific coast the tree is perfectly sound and grows even more rapidly than in the East. A locust tree clipped to the ground is soon restored by sprouts from the stump.

A DANGEROUS PATRIOT.

Maxim Gorky, who in an eventful career has been a jack-of-all trades, turnspit, hewer of wood, and the famous author that all the world knows, is now, unfortunately for his country, a politician and a journalist. The politics of Gorky spell anarchy, Maximalism, Leninism—anything except national defense. Bourkeff, who certainly cannot be suspected of reactionary tendencies, says that Gorky as a politician, is the blindest of the blind and has dealt some terrible blows at the foundations of Russian life.—Exchange.

10,000 METEOR OBSERVATIONS.

Meteor observations in 1916 sent in to the Leander McCormick observatory for discussion and publication by amateurs in the United States and Canada numbered more than ten thousand. This is said to be the largest number of meteor observations ever collected in a single year, except possibly during the years of a remarkable meteor shower.

DISCIPLINARY RULE.

"Don't have any minor keys in this military music?"

"Why not?"

"If it is for the army, it ought to have nothing but major keys."

'ARKING BACK.

The Vicar—What a dreadful plague of caterpillars, John!

John—Ah; an' 'oo let loose the first pair of 'em? Noah?—London Sketch.

A COOK'S PREROGATIVE.

"Why did your cook leave?"

"I never asked her. I didn't know a cook was supposed to have any special reason for leaving."

THEIR CLASS.

"These anti-treating bills are total failures."

"I should call them total failures."

LAW CLERKS ARE WANTED

Competitors Not Required to Report for Examination at Any Place.

The United States Civil Service Commission announces an open competitive examination for law clerk, for both men and women. Vacancies in the Department Service, or other branches of the service requiring similar qualifications, for duty in Washington, D. C., or elsewhere.

The usual entrance salary is \$1,000 to \$1,200 a year.

The list of eligibles obtained from this examination will be grouped into three grades:

Grade I will include the eligibles who have had at least three years' practical legal experience. From this grade appointments will be made to the higher-salaried positions.

Grade II will include the eligibles who have not had three years' practical legal experience. From this grade appointments will be made to the lower-salaried positions.

SUBJECTS.

	Weights
1. Physical ability	10
2. Education, training and experience	90

Total 100

Applicants must have graduated in law from a law school or university of recognized standing, or have been admitted to the bar.

Applicants should state fully and in detail in their applications their general education, training and experience.

Applicants should at once apply for Form 1312, stating the title of the examination desired, to the Civil Service Commission, Washington, D. C.

Millionaires' Sons.

Capt. John Wanamaker, Jr., U. S. R., attached to Camp Dix, a cantonment of the National Army, and Corporal Kingdon Gould, also of Camp Dix, are millionaires' sons.

Captain Wanamaker and Corporal Gould are both newlyweds. Capt. Wanamaker married Miss Pauline Diston, of Philadelphia and New York, at Newport, and Kingdon Gould surprised the society world by marrying Miss Annunziata Camilla Marie Lucci on July 2d.

Gould is attached to the officer of the camp but that does not hamper his training as a soldier. He takes his work of learning to be an efficient soldier seriously and is developing into a first-class fighting man.

RUPTURE EXPERT HERE

Seeley, World Famous in This Specialty, Called to Hopkinsville.

F. H. Seeley, of Chicago and Philadelphia, the noted truss expert, will be at the Latham Hotel and will remain in Hopkinsville Friday only, Dec. 14. Mr. Seeley says: "The Spermatic Shield will not only retain any case of rupture perfectly, but contracts the opening in 10 days on the average case. This instrument received the only award in England and in Spain, producing results without surgery, injections, medical treatments or prescriptions. Mr. Seeley has documents from the United States Government, Washington, D. C., for inspection. All charity cases without charge, or if any interested call, he will be glad to show same without charge or fit them if desired. Business demands prevent stopping at any other place in this section."

P. S.—Every statement in this notice has been verified before the Federal and State Courts.—F. H. Seeley.—Advertisement.

Childish Imagination.

The joy that the real fairies and elves and little people give to children, the delight they can find in imagining a world where anything is possible, where there are no boundaries of facts, where all is beautiful and always surprising, is hard to gauge because we are so remote from it. But it is very real to them and is a starting point for other more wonderful and more instructive tales, because it is so easy to grasp and it has such an unadulterated appeal to the imagination of a very young child.—Exchange.

Still Allowed to Breathe.

Louisville, Miss., Dec. 8.—An ordinance, passed 3 to 1 by the city council, has abolished all public amusements except dancing, for which women residents fought hard, and the municipal solons yielded grudgingly to their pleas.

Among the pastimes taboo are circuses, shows, theaters, billiard tables, pool rooms, bowling alleys, itinerant sellers of medicine, corn doctors, pet bear exhibitions, fortune tellers, luncheoners, museums, menageries, muscle testers, flying horses, shooting galleries, skating rinks and roller coasters.

Ink Spots in Books.

Anyone who has been unfortunate enough to get ink on a favorite book, or, worse still, a borrowed one, may be interested to know how one housekeeper removed such disfiguring marks. She bought a little oxalic acid, diluted it with cold water and painted it over the ink spots with a fine camel's hair brush. Then she applied a sheet of blotting paper to the stained part, and absorbed the stain with the liquid.

Be the First.

Many a quarrel would come to a speedy ending if both sides were not afraid of being the first to make advances. Instead of being unwilling to take the first step, you should be glad of the chance. Some of you perhaps, are a little inclined to be envious of the one who is a born leader, who is the first in so many things, but there is no greater honor than to be the first to end a misunderstanding, the first to say, "I'm sorry."—Exchange.

The Individual.

The initiation of all wise or noble things comes, and must always come, from individuals—generally at first from some one individual. The honor and glory of the average man is that he is capable of following that initiation; that he can respond internally to wise and noble things.—John Stuart Mill.

Who Invented Ice Cream?

While it has been confidently asserted for many years that "Dolly" Madison, wife of the president of the United States, invented ice cream, the truth of the matter is that this delicacy was introduced to the English aristocracy of the eighteenth century by a London confectioner named Gunther, who may or may not have been its inventor.

Meaning of "Purim."

The word "purim," the name of the great annual festival of the Jews, means "lots." This feast commemorates the preservation of the Jews in Persia from the massacre with which they were threatened by Haman (Esther 9). They gave the name purim or "lots" to commemorate the festival because he had thrown lots to ascertain what day would be auspicious for the massacre.

Shaping One's Own Destiny.

We all shape our own destiny. There is no use in blaming our parents, or the life around us, for what we are. On the other hand, we should keep in mind the well-worn adage, "Any dead fish will float down stream, but it takes a live one to swim against the current." Every one of us can improve ourselves mentally and thus fit ourselves for better work if we but make an honest effort to do so. Competition is pretty keen these days, hence the indolent and the "I wish I were" type stand absolutely no chance for a hearing.—Exchange.

A Good-Hearted Man

By ALAN HINSDALE

(Copyright, 1917, Western Newspaper Union.)

My brother Jim and I inherited enough money from father to go into business and we set up a hardware store. Not having any custom to start on I went out beating up trade, leaving Jim in the store to do the inside work. I was a pretty good salesman, if I say it myself, but Jim made a mess of his part of the business. He did not keep at the financial part of it at all. He would trust any one, and the consequence was that we were soon loaded down with bad debts.

One evening after business hours we figured up and found that we couldn't go on. Jim had advanced money to certain parties who had played upon his feelings. He agreed to go out of the concern, assuming those debts and leave me to try to wind up the concern. He took himself off to a neighboring town and I went to work trying to get in the bad debts he had made.

There were so many of them, large and small, that it would take me a lifetime to run them all down. So I hired a collector. I paid him a hundred dollars a month and at the end of the first month he turned in \$75. This was not paying, so I dismissed him and hired another collector. He made a worse failure than the other man. I hired five men in succession, then switched off and a woman having applied for the position I engaged her.

Since Miss Julia Sparks had a winsome way with her I believed she would succeed where others had failed. And she did. The first month she worked for me she got in \$300, the second month \$1,000 and the third \$2,300. She continued her work till she had got in every outstanding debt.

Jim's assuming the loans he had made didn't help me at all. He could neither collect them nor pay them himself. I was sued as his partner on one of them and the case went against me. So I was liable for them all.

"I wonder," said Miss Sparks one day, "if I couldn't collect those debts for your brother, so as to enable him to pay them to you."

"If you can and will," I replied, "I will grant you any favor you ask."

"Well, I'll try," she said. "Can you give me a list of them?"

I gave her the list and she started out to see what she could do. She found it very hard work. The debtors were mostly "dead-beats," who had imposed on Jim's good nature, and some of them had no money to pay with. Those who had the money were skinflints, who never paid until they were compelled to at the end of a lawsuit.

Miss Sparks started out on her work. The first day she succeeded in getting three dollars that Jim had loaned a young sport who got rid of it the same day at pool. I think he must have gone sweet on the collector, or he never would have paid the loan in the world. Miss Sparks neverred that he had won some money at poker the night before and she caught him in the nick of time. Three days later she got in two amounts totalling eight dollars. The amounts she collected were sometimes paid to her, but these were small ones. All the large ones were paid to Jim.

At the end of three months' hard work Miss Sparks told me that she had got in 50 per cent of the amount, 25 per cent having been paid directly to Jim. The remaining 25 per cent was uncollectable, either because the debtors were without any means whatever or could not be found. The amount Miss Sparks had collected—sixteen hundred dollars—she turned into me. She asked me, should Jim turn in the amounts paid to him would I, upon his promise to turn a deaf ear to applicants for loans and sell only good buyers, take him back into the firm. After refusing for some time I at last gave in. I was puzzled to understand why she was interested in Jim's reinstatement.

She came into the store the next afternoon with a pair of red eyes, showing that she had been weeping. When I asked her what was the trouble she told me that she had gone to Jim for the amounts paid him and found that he had loaned or given away every cent that had been paid him.

Her interest in Jim and her connection with this matter remained to be cleared up. She and Jim were old acquaintances. He had loaned her money, so that she was one of the debtors. She had fallen in love with him, and knowing of his difficulties resolved to get him out of them. She had collected all the slow debts he had made for the firm, and then had to get to work on the amounts he had loaned. She was much crestfallen at the result.

"If you hadn't got stuck on Jim," I said, "I would ask you to marry me. You've not married Jim, have you?"

"Yes, I have," was the reply.

"Well, you and Jim come in here. Jim can be salesman under you, you to decide whom to trust. I'll be outside man. How does that suit you?"

She threw her arms about my neck and cried some more. The firm was reorganized and turned out a great success.
